In the future, we will (将要) live in smart homes.

The smart home will tell us the weather. It will say, "Today is rainy. Wear your coat and boots."

When we leave home, it will turn off the lights by itself. When we come back, it will turn on the TV and play our favourite music.

A smart robot can cook dinner for us. It will know what we like to eat.

A smart bed will check our sleep. It will tell us if we sleep well. A smart toilet (卫生间) will check our health, too. It can tell us to drink more water or eat more fruit.

The smart home can know how we feel. If we are happy, it will play happy music. If we are sad, it will tell us a funny story or talk to us to make us feel better. The smart home wants us to be happy every day.

Life in the future will be easy and fun. We will be happy and healthy.
